

ABOUT THE SCHOOL

The Pennsylvania Cyber Charter School (PA Cyber) is the premier online K-12 educational provider for students and their families in combining the best technology, personal instruction and approved curriculum with highly qualified teachers. PA Cyber is a public charter school with over 10,000 students.

Each PA Cyber student is provided with a state-of-the-art computer, printer and Internet access, as well as textbooks, materials and school supplies. PA Cyber uses curriculum, which is approved by the Pennsylvania Department of Education.

PA Cyber makes accredited curriculum available to its students any time, any place, at a pace appropriate to that student. Every student receives a custom-designed course of study to meet his or her individual needs and abilities. Parents, along with their child's instructional supervisor, play a vital role in the school by keeping the student on task, motivated, and challenged.

The PA Cyber Charter School has a wide variety of Pennsylvania families and students. They include motivated, independent learners, gifted students, students who travel (e.g. athletes, performers, etc), home-schooled students, students not reaching their potential in a traditional classroom setting, working students, young mothers or fathers, disabled or ill students, college-bound students and credit-deficient students.

"We firmly believe that every student can succeed in the right learning environment. That is why PA Cyber works with each student to build a school that works best for them."

Dr. Nick Trombetta, CEO, PA Cyber
