

PARENT TESTIMONIALS

My child's grades were beginning to fall. The Cyber School offers more courses of interest and constantly available teachers to overcome problems. This was the best move we could make for our child's education.

– Steve Felder, Kunkletown

“Quality instruction, committed teachers, great curriculum, wonderful support, all the technological bells and whistles, flexibility to work at advanced (or remedial) grade levels, ability of parents to be more involved in the process, what more can I say!”

– Betsy Rodgers, Mechanicsburg

“We couldn't see any reason NOT to join PA Cyber. PA Cyber contains the aspects that the best of our state's public, private, parochial, and fine arts schools provide to students. In addition this quality is measured out to EVERY PA Cyber student. With PA Cyber, it doesn't matter if your children are minorities, are poor, are struggling, that their parents aren't well known or hold prestigious employment. Here, a child's zip code does not dictate what success he will obtain. Our kids really are receiving a quality education that is interesting to them...We hope our legislators will always feel that the needs of the children take precedence over anything else.”

– Charlene Turner, Pittsburgh

I am a Reading Specialist with a strong desire to teach my children how to read. PA Cyber made that choice easy and possible with their great curriculum choices and extraordinary support system for their cyber families...After doing some research into our local public and private schools, I decided that individualizing my children's education WAS the best way to educate them, so my daughter (currently in 6th grade) and my son (currently in 5th grade) have been PA Cyber students since kindergarten and LOVE it.....and so do I! They have not missed out on ANY socialization skills either, mostly due to the fact that PA Cyber offers a huge variety of activities through their incredible Family Link system, but also because we can pick and choose as a family the type of social activities in which to involve our children. We believe it is our job as concerned parents to expose our children to quality education, and PA Cyber provides us with that opportunity!”

– Jennifer Mesick, Greensburg

“We chose PA CYBER school this year for our 8 year old little girl who has a chronic illness and disability called RSD. She cannot attend a brick and mortar building everyday because she misses too much school with absences and doctors appointments...We like the fact that she can take her work along with her and do it at her own pace so she does not feel overwhelmed and she's just having the best time with this experience this year. We feel as her parents that we made the right decision for her and our family and her medical health and welfare.”

– Susan & Lyle Leiner, Marietta

Our daughter suffers from a chronic disability and could not attend “regular school” on a consistent basis. If it was not for PA Cyber she would be missing vital education and receive a failing grade. Because of PA Cyber she is flourishing and routinely earns A’s.

– John Jones, Pittsburgh

My 2 youngest daughters Leah (graduating this year) and Bethany have both been in PA Cyber School for high school. It has been a good experience for all of us allowing both my daughters to be involved with competitive skating, dance, music, piano and time during the week to attend a gym throughout the week. The staff and resources available are great! My relatives/friends in other states only wish they had the same program. Thank You!

– Barbara Maher, New Providence

My 8th grade daughter was struggling terribly in our public school district. Simply put, my daughter needed more than the district could provide. After a long family discussion, we decided to give PA Cyber a try. We enrolled my daughter in January of 2008, and I have to say it was the best decision we have ever made...In her public school, she was always falling behind and did poorly. With the self paced classes PA Cyber offers, my daughter can continue to review areas that are problems for her. She doesn't move on in math until she understands the concept being taught. As it turns out, my daughter doesn't have nearly the math issue we thought she did; she just needed to be able to go at her own pace. I am happy to report that her current math grade is an A, and she is doing well in all of her other classes too. Thanks so much.

– Debbie Fosselman, Newport
